

McNaughton ALTI

Where Craftsmanship Meets
Innovation for New Zealand Homes

42 Frost road, Mt Roskill, Auckland
(09) 620 90 59

McNaughton ALTI is an ultra-smart window and door system, incorporating both aluminium and timber using advanced technology from the USA and Europe.

Designed with New Zealand architecture and climate in mind, McNaughton ALTI provides your home with the best of both worlds. The natural wood interior allows you greater freedom with your interior styling and the low-maintenance aluminium exterior is coated with a durable powder-coated colour with over 100 colours to choose from to suit your exterior.

McNaughton ALTI increases the energy efficiency of your home. The timber interior provides a natural thermal break, and in many cases, eliminates condensation and mildew growth entirely. The energy efficiency of your home can be dramatically enhanced, particularly when combined with double glazing.

Make a statement of quality and consider McNaughton ALTI for your home.

Custom Made in New Zealand
